-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Lipman US 3,422,996.

Lipman discloses a safety switch (Fig. 3) having a knob 36 adapted to be rotatably mounted on a pushbutton 30, 16 and having an extension 34 integrally formed with the knob and an abutting plate 42 formed on an outer periphery of the extension; and a stop 40 having a passage 46 adapted to be integrally formed on an inner face of the panel 18 to correspond to and engage with the abutting plate so as to prevent the movement of the pushbutton, whereby after the rotation of the knob to misalign the abutting plate with the stop, the pushbutton is able to be pressed to release water from the water dispenser.

Claim Rejections - 35 USC § 103

3. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lipman US 3,422,996.

Lipman discloses two guides 50 and 52 and a secondary abutting plate 44 formed on the outer periphery of the extension to prevent excessive rotation. Lipman discloses the claimed invention except for the location of the two guides on the pushbutton. It would have been obvious to one

having ordinary skill in the art at the time the invention was made to put the guides on the inner face of the pushbutton instead of on the panel, since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Doult, Cooke, and Meyer disclose rotatable knobs on pushbuttons.
